

MST Release Notes

Build: August 05, 2024

The following enhancements will be implemented in the June Mobile Sales Tool – Showroom Release.

MST Enhancements

Finalized Trade-In Status

A new status of “Finalized” will now show for trade-in vehicles that have been applied to a finalized write-up. With this update, any trade-in vehicle fields in the “Finalized” state cannot be edited or deleted, however images can still be added at any time. To move the trade-in out of “Finalized” status, the “Start Over” button must be used on the finalized write-up(s) that have the trade-in applied.

The screenshots illustrate the trade-in process and pricing details. The top-left screenshot shows the 'TRADE-IN' section with a '2021 JEEP Wrangler' listed as 'FINALIZED'. The top-right screenshot shows the 'TRADE-IN' details page with fields for vehicle details, payment details, and value. The bottom-left screenshot shows the 'PRICING' screen with a '2024 Grand Highlander Hybrid XLE' and a '2021 JEEP Wrangler' listed as 'Finalized'. The bottom-right screenshot shows the 'PRICING' screen with a '2024 Grand Highlander Hybrid XLE' and a '2021 JEEP Wrangler' listed as 'Processed'.

After clicking “Start-Over”, the write-up will move back to the pricing screen with previous selections retained, and the write-up will move to processed (if the trade-in is not applied to another finalized write-up).

Bug Fixes & Additional Enhancements

MST Release Notes

Build: August 05, 2024

SmartPath

- Fixed an issue where roll payment wasn't including cash incentives in the payment calculations.
- Fixed an issue where \$NaN was showing in the pricing screen printout.
